

*In Vivo* - Animal model based Assays

Services Offered	Details	Sample Type
In vivo Studies		
	Acute Toxicity Studies (Rodents) as per DCGI Guidelines	Synthetic compound/herbal extract/Nanomaterials/ medical formulations/etc.
	Subacute Toxicity Studies (Rodents) as per DCGI Guidelines	
	Subacute Toxicity Studies (Non – Rodents Rabbits) as per DCGI Guidelines	

**Conditions for Acceptance of test compounds**

- Solubility /Concentration of the compound should be provided.
- In case of sterile compound given sterility will be checked according to laboratory standards and sterile compounds will be accepted for the assay.
- Cost for Cell line based assay includes **only for five groups** (including positive control, control and test groups etc.).

For MTT assay 10 different concentrations would be performed along with test and vehicle controls.
